## **DETAILED ACTION**

### ***Drawings***

1. Figures 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Regarding Claim 1, Rudrapatna, Chen, Gopalakrishnan, and Tsien do not teach, alone nor in combination, the combination of:

a transmission rate determining part for determining a transmission rate in accordance with a size of transmission data to the mobile station; and

a transmission power changing part for changing a transmission power of the transmission data in accordance with a predicted error correction gain difference depending on the determined transmission rate;

the transmission power changing part being provided with one or more tables prepared in advance that show the relations' among the size of the transmission data,

the error correction gain difference, and a change amount of the transmission power, such that the changing of the transmission power is carried out with reference to the one or more tables.

Claim 6 is allowable for similar reasons as claim 1.

Regarding Claim 10, Rudrapatna, Chen, Gopalakrishnan, and Tsien do not teach, alone nor in combination, the combination of:

determining a transmission rate in accordance with a size of transmission data to the mobile station, and

determining a transmission power of the transmission data in accordance with a predicted error correction gain difference depending on the determined transmission rate;

the step of determining the transmission power being carried out with reference to one or more tables prepared in advance that show the relations among the size of the transmission data, the error correction gain difference, and a change amount of the transmission power.
